Ungrading

Ungrading emphasizes learning through formative feedback, decentering the instructor and moving away from grades and points.

When Should I Use Ungrading?

Use ungrading to create a classroom culture that emphasizes learning and metacognition. This strategy works well when rethinking due dates, policies, assignments.

How Do I Use Ungrading?

Gain student buy-in and trust by explaining that ungrading offers an opportunity to explore learning without the pressure of securing points. Start with one assignment, and keep the focus on learning.

Why Should I use Ungrading?

This strategy moves learning away from assigning points based on a faculty member's singular perspective. Research shows that grades do not encourage learning and can actually distract from feedback.
